Job Description

This position will be responsible for SQL server administration and development of SQL reporting. Candidates should be well rounded and enjoy working on a variety of different development projects. Successful candidates will provide consultation, showcase innovation, interact with clients and be involved with future program and business planning.

Responsibilities

- Develop and manage SQL reports for multiple contact center clients and divisions
- Work with account managers and client contacts to fulfill reporting requirements and identify opportunities to improve
- Manage multiple point of data integration to ensure all systems and information required to produce reporting is in place
- Proactively identify opportunities to improve data collection, report cosmetics and report graphical presentation

Requirements

- Strong foundation in SQL development, .NET, API Development
- Skilled in SQL tools such as SSRS, SSIS, and SSAS
- Confer with staff, users, other departments, and management to establish requirements for creating a new system/report or revising existing systems/reports.
- Knowledge of project management and development methodologies desired.
- Strong team player that will promote teamwork and excellent communications.
- Enjoy project-based work and be capable of multi-tasking several projects at once, delivering them on-time and on-budget.
- Strong interpersonal skills are also required.
- Experience with service technologies such as XML and Web Services is highly desirable.
